

Fountain Solution

Hydro Plus

Alcohol Replacement Fountain Additive

Part of CLC SYSTEM

Hydro Plus is used successfully by many world wide. It provides an excellent overall balance between the wetting and viscosity needed to successfully replace alcohol and keep water settings at a minimum. Add it to any fountain solution for a total replacement of alcohol. Hydro Plus reduces the surface dynamic tension of water to the 30s.

- Low Dosage
- Reduces piling
- Usable with all fountain solutions
- Reduces surface tension to the low 30s
- Allows wide latitude of wetting
- For use on sheet-fed or web equipment

Direction For Use:

Recommended dosage range - 2 oz. to 4 oz. per gallon. We recommend starting with 3 oz./gallon. Once running, adjust dosage up or down as needed.

Recommended dosage range 1.5% to 3%. We recommend starting with 2.5 %, adjusting dosage up or down as needed.

Ask your distributor or Allied about other dedicated CLC System Products:

A coordinated pressroom chemistry program designed to control calcium and surfactant contamination across the fountain loop, plates, blankets, rollers, wash system, and fountain solution.

Specifications	
VOC Content lb / gallon	731
VOC Content grams / liter	6.1
Flashpoint	> 180 °F
Color	Clear
CA Compliant	Yes
