

# AR ULTRA CLEAN

## Heavy Duty Cream Cleaner

AR Ultra Clean is a lower alkaline deep penetration cleaner containing detergents, solvents, emulsifiers, with anti re-deposition agents and with just enough of small micron reduction abrasives to maximize performance. When deeper cleaning is required and other products fail or take to long, reach for AR Ultra Clean. Outstanding results when used to clean gravure and chrome cylinders. High viscosity allows for a controlled application where the product clings to the surface, allowing the powerful cleaners to work better, lifting and removing all ingrained pigments, resins, stains and not allowing them to re-adhere during the process. Gives the operator more time.

- Powerful and extreme deep cleaning properties
- Micro reduction abrasives
- Ink and Coating Cleaner (Standard, UV, EB)
- Viscosity allows controlled application
- Low alkalinity is less aggressive toward both the press and the user

### Direction For Use:

Squirt sufficient AR Ultra Clean directly onto surface and or onto the shop towel / sponge using enough to coat the roller surface. Clean using your customary procedure. When the roller is clean wipe over with a clean towel / sponge and rinse with water or a water based wash similar to our Xtra Flex Wash to remove any residue from the cleaning process.

Note: We recommend using a damp shop towel.

### Specifications:

VOC content lb. / gallon	4.6
VOC content grams / liter	553
Flashpoint	120°F
Color	Tan
CA. Compliant	No

### Available In:

Product Code	Unit	Case Qty.
F21012C	1 Quart (0.946 ltr)	6
F21012D	1 Gallon (3.785 ltr)	4
