

Relief XUV

Cleaner & Calcium Remover

UV (energy curable) inks and coatings

Treats Rollers, blankets and in water tanks of auto wash units. As a cleaner & calcium carbonate dissolver or use it on just cleaned rollers and blankets to clean deeper while dissolving the calciums left behind from paper stocks and certain inks.

- Cleans and dissolves calciums
- Inhibits calcium build-up for longer periods of time
- Removes surfactants and other wetting agents
- Improves ink roller & blanket transfer
- Does not contain petroleum

Directions of Use:

Rollers & Blankets Rollers: Wash up with a general roller wash to remove ink. Apply a liberal amount of Relief XUV on top roller to wet the entire roller train, adding more if necessary. Allow Relief XUV to oscillate throughout the roller train for 5-10 minutes. This will ensure calciums are dissolved and surfactants are removed. Flush off with water or press wash.

Blankets: Clean with a general blanket wash, saturate a rag/towel with Relief XUV and wipe the entire blanket with it. Allow it to dry.

Automatic Wash unit Water Tanks: Add 1 quart Relief XUV for every 30 gallons of water. This will dissolve calciums and help to clean deeper.

Specifications

VOC Content lb / gallon	7.2
VOC Content grams / liter	858
Flashpoint	232 °F
Color	Colorless
CA Compliant	NA
